Segment : Manufacturing**Solution** : Smart VPN**Highlight** : Mumbai-based Manufacturer achieves Complete Voice and Data Connectivity

OVERVIEW

The customer is an established manufacturer of speciality chemicals, based at Mumbai, and was the pioneer manufacturer of quality sulphuric acid and phosphate fertilisers in India.

CHALLENGE

The customer required secure, uninterrupted connectivity between their three remote locations. Additionally, it had to be easily scalable, providing for interconnectivity between locations and allowing for voice communications.

The customer was looking for a reliable partner to provide a complete, managed solution for the network.

SOLUTION

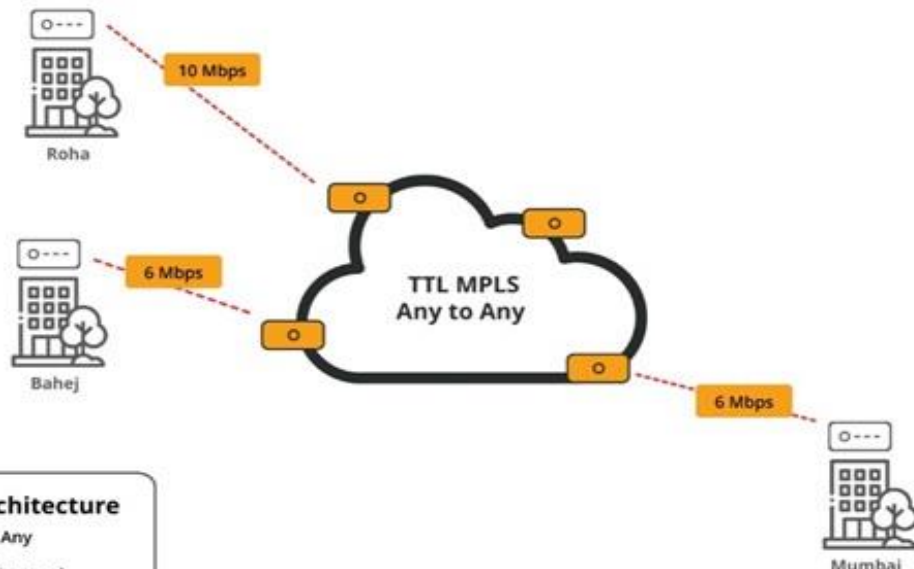

TTBS provided an MPLS any-to-any topology to connect their three locations, allowing for inter-voice communication and hybrid last-mile connectivity.

A SAP server was hosted in one location providing access to the other two locations. TTBS also provided complete Managed Services.

BUSINESS BENEFITS

- **Secure and scalable connectivity:** MPLS provided for safe, private connectivity, scalable with the customer's growth.
- **Managed Services:** TTBS managed the entire services.
- **Cost-savings:** Inexpensive voice communication between locations and QoS allowed for multiple applications to be accessed at lower costs.

Solution Architecture

Topology: Any to Any
Routing: Static
Manageability: Managed
COS: Platinum
